From Taralyn Wohlfeld

To CE PENG

Hi Ce,

I sent you the next invite to the Life Story interview. I spoke to the team and I think the Data Science position will be best suited for your background.

The Life Story interview is for us to learn a little bit more about who you are as an individual: the different positions you've had and the different decisions you've made throughout your life. There is nothing you have to prep for just come prepared to share with the interviewer all about your life journey thus far.

All the best,  
Taralyn

Hi Ce,

Don't worry about reapplying. I am going to bring your info back to both teams (data eng and data science) to see what would make most sense.

I will be in touch with you in the next two days!

Thank you,  
Taralyn

Hi Taralyn,

Many thanks for our nice talking this afternoon and help me understand the duties in the opening position in Shopify.

But when I reviewed the job description of <https://www.shopify.ca/careers/senior-data-engineer-america-remote-6932cbed>, it reminds me that should I re-apply the this open position? Because, for my previous application of data scientist and the current open position of data engineer, they seems in two job pools.

So I am wondering that should I need to re-apply this open position?

Many thanks again.

Best regards,

Ce
